

# Is there something you want to suggest the library purchase?

If we don't have what you're looking for, you can request to borrow it from another library or you can suggest it for purchase.

Go the library's catalog  
<http://www.lmlibrary.org/catalog>

Log in on the left side of the screen using your library card number and password. The password is the same password you use to login to the computers or use the self-check machine.

If you do not know your password, you can ask at the front desk.

Search for the item you want. In this search, I'm looking for all books by Molly Harper. The search shows that our library only has the second book in a series, and I want to suggest the first book be purchased.

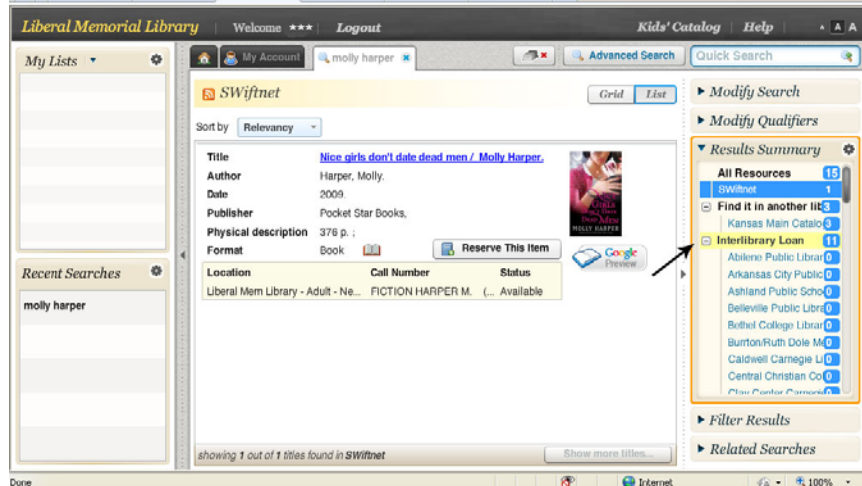

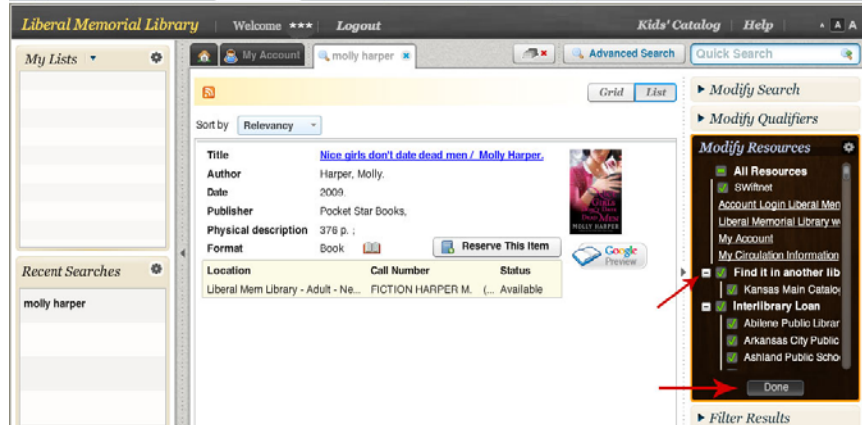

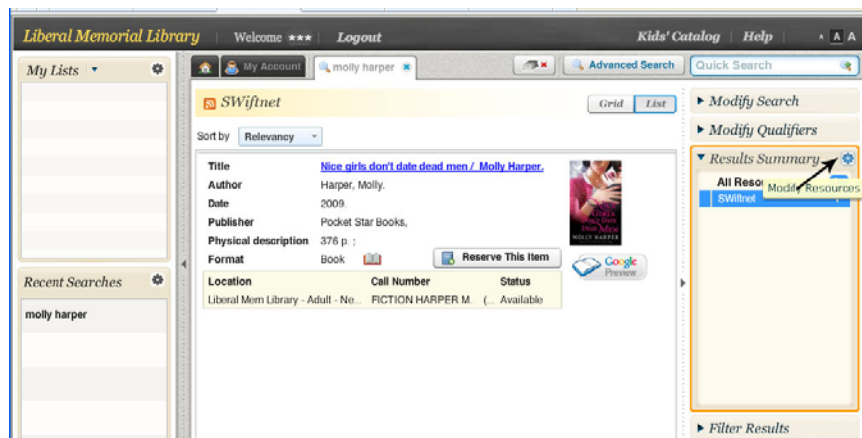

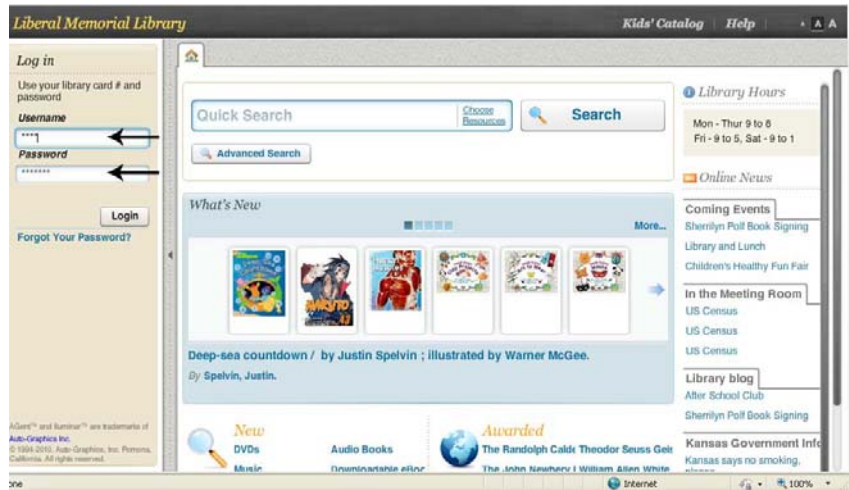

First I modify the search to look for the book I want in other libraries. Click on  next the **Results Summary** to modify the resources being searched.

Click on the boxes next to **Find it in another library** and **Interlibrary Loan** to include them in your search.

Click **Done**

The results show 3 hits in one section and 11 hits in the other.

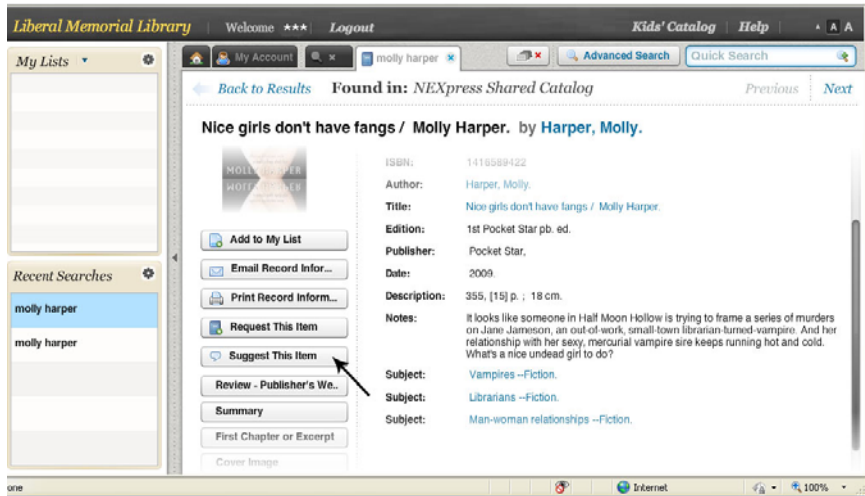

Click on either **Find it in another Library** or **Interlibrary Loan** to see the results.

Find the item you want and click on the title highlighted in blue.

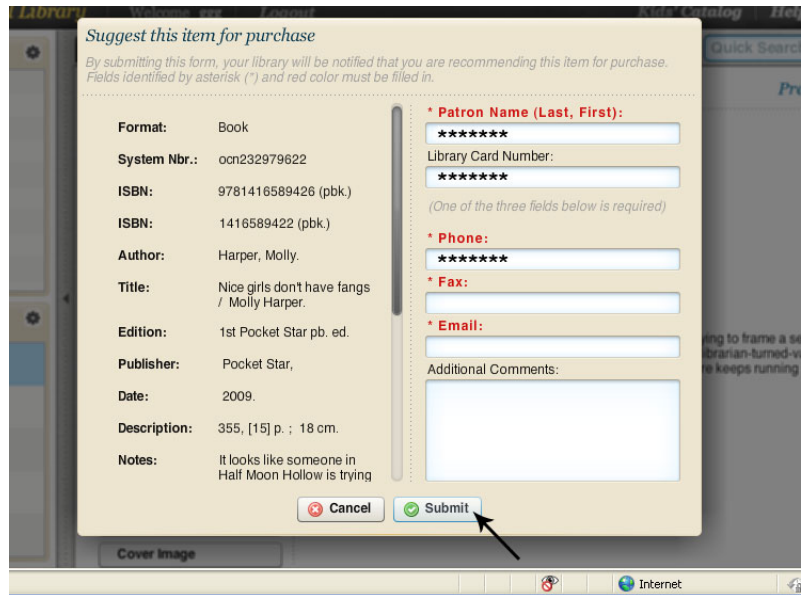

At this point you can make an Interlibrary Loan request by clicking on  Request This Item or suggest this item for purchase by clicking on  Suggest This Item.

Fill out the form.

You can type in Phone, Fax, or Email for your contact information and any additional comments.

Click Submit

An email will be sent to the library with your suggestion.
